## Interactive Presentation & Whiteboard System

**Now you can control, manage and enhance your presentations.** IdeaPen™ is more than just a laser pointer. It allows you to control, modify and enhance your presentations from a distance. You can also **START, ADVANCE OR REVERSE THROUGH PRESENTATION SLIDES** as you would with a remote control. Highlight important points on the screen. Change the width of the lines. Change the pen's color. You can even **SAVE THE CHANGES YOU MAKE TO THE PRESENTATION**. Point the laser pointer anywhere and your mouse follows. Control all your PC mouse functions from the back of the room with the laser. Simply connect the sensor to your computer via USB with a one step (5 sec) synchronization and you're on your way to effective meetings and dynamic presentations.

### Interactive Whiteboard Functions + Wireless Mouse + Laser Pointer+ Conference Tool

#### IdeaPen

#### Sensor

Enhance your presentation the easy way

#### Features

##### Dynamic and interactive presentations

No white board required. The laser pointer works effectively against any solid, white, low reflection surface.

##### Control from a distance

Use the laser pointer to control your presentation and your PC's mouse functions. Even work through walls.

##### Make direct changes to your presentation

Turn your projected image into a digital workspace where you can write, draw and make changes and save directly.

##### Share your meeting through the internet LIVE

You can also share your presentation/meeting with participants from other locations and make live comments and changes

##### Programmable short-cut buttons

Use the programmable short-cut buttons to further enhance the efficiency and versatility of the IdeaPen.

##### Easy connection and setup

Use the USB connector to connect the IdeaPen to your notebook. Complete the easy one-step synchronization with your projector and begin your presentation.

##### Cost effective solution for mobile presentations

With its easy set up and connectivity, light weight and portability, the IdeaPen goes anywhere and adds flexibility to your presentations and meetings.
